Work History

2019-08 -
Current

Core Automation Engineer

Tumblr, Automattic Inc, New York, NY

- Automate and execute Android and iOS mobile release process to save developer time and facilitate transition to one week release cycle
- Utilize Puppet and Jenkins to upgrade and maintain CI/CD infrastructure
- Build automation tools using the GitHub, Jira, and Slack APIs on ad hoc basis for Test Engineering, Mobile Core, and other teams
- Transferred 20+ core automation tools and services to new Kubernetes cluster during data center migration

2018-07 -
2018-08

Mobile Release Engineering Intern

Tumblr, Verizon Media, New York, NY

- Developed lockdown bot to ensure all mobile developers merge pull requests for given release milestones
- Created stale translations detector that identifies missing translations from each language in Tumblr's mobile application
- Coded a file grader to determine the stability of individual application components in order to allow for their correction and prevent future bugs

Education

2016-08 -
2019-05

Bachelor of Arts: Computer Science, *Summa Cum Laude*

Queens College of The City University of New York - Flushing, NY
